

Specialist in the design and manufacture of automated packaging machines

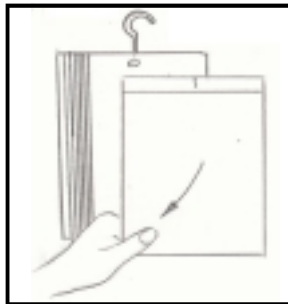

Manufacturers of paper bags for retail use: this important information will be of interest to you

SPECIAL MACHINE FOR ASSEMBLING PAPER BAGS BY SPECIAL PLASTIC FASTENERS (WITH HOOK) FOR HANG UP IN THE RETAIL TRADE

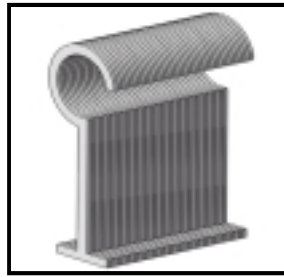

Paper bag stacks

Tearing off a bag

Type of suspension plastic fastener

MAIN SPECIFICATIONS

This machine which is simple of use and maintenance enables to rapidly achieve a high quality assembling of paper bags by plastic fasteners with suspension hooks for hanging up display in the retail trade or chain stores.

This type of packaging permits compact bags stocking by maintaining them firmly assembled at the suppliers' or the users'.

FLEXIBILITY Enables to assemble bags of different sizes and shapes. The thickness of the stacks to be assembled can vary according to the paper quality. On average 100 bags can be assembled together. Changing plastic fasteners is ultra fast: 30 seconds maximum.

QUALITY Perfect assembling quality. A simple traction on a bag will tear it off from the stack without damage (excellent display).

SAFETY The design of this machine is totally safe for the operator.

MAINTENANCE Easy and low maintenance due to the sturdy design of this machine.

PRODUCTIVITY About 500 stacks/hour. May vary according to the operator skill, the production run rate, and the type of workstation.

APPLICATIONS Bread / treats / food / pharmacy bags etc.
