

Specialized in the Research and Design of making-up, labelling and packaging machines for the textile industry.

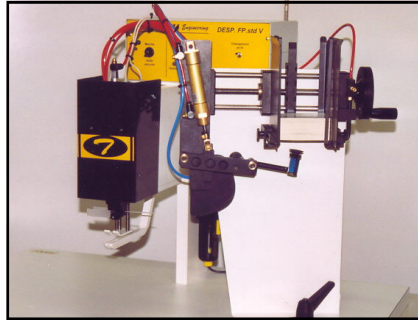

PNEUMATIC MACHINE FOR FASTENING TAGS OR LEAFLETS BY PLASTIC PIN TO UNDERWEAR, CORSETRY, GARMENTS ETC.

EQUIPPED WITH 1 OR 2 AUTOMATIC TAG DISPENSERS

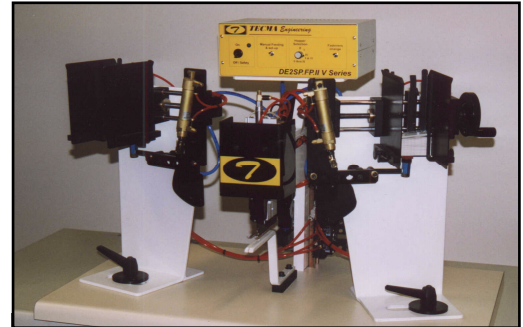

Important Information

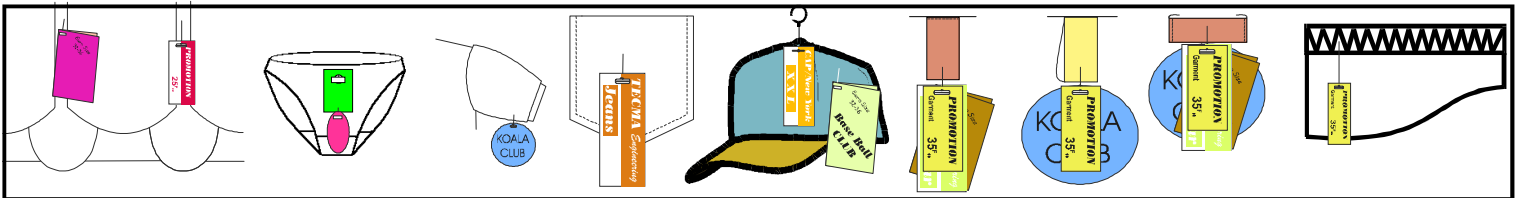

Eliminates hand pain (repetitive strain injury) resulting from using manual tagging guns.

Model with 1 automatic tag dispenser

Model with 2 automatic tag dispensers

MAIN SPECIFICATIONS

SIMPLICITY :

This is a sturdy device with very simple installation and maintenance. It enables to fasten labels of all shapes and sizes to any flat or tubular product thanks to its special lower free arm. It is available with 1 or 2 automatic tag or leaflet dispenser.

SAFETY :

no fatigue, no hand pain for the operator (avoids repetitive strain injury troubles , which are exhausting and reduce the operator production capacity), thus bringing comfort and productivity.

This machine is controlled by pneumatic pedal which frees operators both hands.

This concept also results in total safety for the operator.

QUALITY:

No product damage even to very fine products thanks to its special fabric maintaining device during operation.

FLEXIBILITY:

Changing tag shape or size is achieved in a few seconds without any tool by the operator. Uses different lengths of plastic pins of the market (Nylon or Polypro made).

PRODUCTIVITY:

Up to 1200 taggings / hour.

This production may vary according to series volume, type of workstation, and operator skill.

APPLICATIONS:

CORSETRY,
UNDERWEAR,
GARMENTS

HOME TEXTILES,
GLOVES,
CAPS,

LEATHER PRODUCTS
SLIPPERS,
TIES ETC.
