

Machine for fastening rider header cards (cardboard- or plastic-made) to car mats, door mats by special highly resistant plastic fasteners for replacing metalical staples.

This new process uses special plastic fasteners for replacing metalical staples without causing any damage and being very easy to remove by the consumer.

IMPORTANT SPECIFICATIONS

Plastic fasteners are applied thanks to a micro perforation device which facilitates the fastener penetration so that they do not cause any damage to heavy and rigid products like CAR MATS, DOOR MATS or SIMILAR PRODUCTS.

QUALITY

Highly resistant fasteners for hanged up products.

Excellent display.

The fasteners are very easy to remove by the consumer.

FLEXIBILITY

Several fasteners can be applied to different places on the product without any adjustment (by moving the product).

PRODUCTIVITY

High productivity thanks to the fast fastening cycle.

APPLICATIONS

Car mats or similar products.
