This economical and performant device has been designed to be adaptable for avoiding to purchase a sewing machine.

3 thread
1 needle

4 thread
2 needles

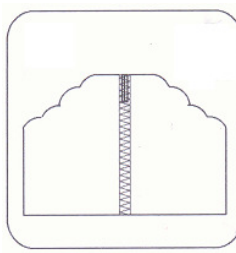

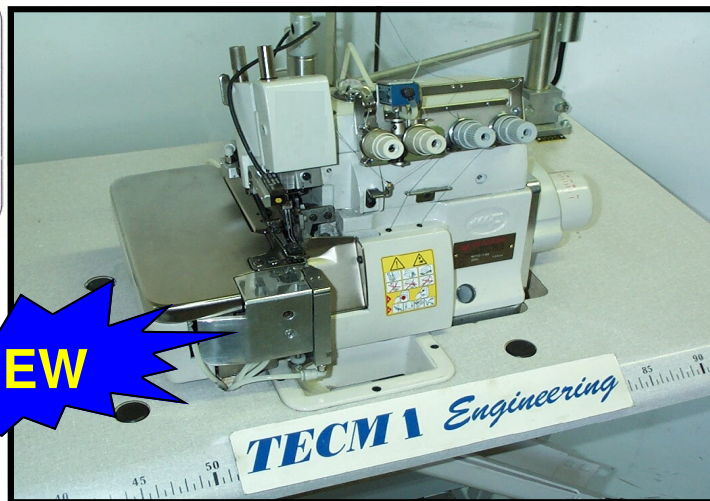

Diagram n°1

MAIN SPECIFICATIONS

QUALITY

No thread ball at the beginning of the backlatch thanks to its special feeding device.

Seams of very small widths can be sewn particularly in corsetry or women's underwear.

Backlatches are very short.

Fitted with a tightening device for reinforcing the stitch at the beginning of the seam (diagram n°1).

FLEXIBILITY

Changing from 4 thread 2 needle to 3 thread 1 needle is very fast by removing one needle.

Handles fine and medium fabrics.

This device can be used as traditional chain cutter and it is possible not to use the automatic backlatch device.

Adaptable to machine Pegasus (Yamato, Juki, Brother : contact us).

SIMPLICITY

Simple of use and maintenance.

Enables to achieve quality work without specific qualification from the operator.

APPLICATIONS

Underwear, garments, lingerie, corsetry .
