

NEW RIDER LABEL FASTENING MACHINE TO HOUSEHOLD OR BATH LINEN BY SPECIAL SEWING STITCHES FOR THICK AND COMPACT PRODUCTS TYPE : NAPKINS, TOWELS, GLOVES, BATHROOM MATS, ETC.

This unit replaces plastic fasteners that struggle to perforate thick and compact products and cause **needle breaks and holes onto products and header cards.**

MAIN ORIGINALITIES OF THIS EQUIPMENT UNIQUE ON THE MARKET:

QUALITY: a) Enables to pack products up to a maximum thickness of 28 mm thanks to a new device for making a special sewing stitch for thick products.

b) The wide and flexible sewing stitch avoids header cards marking or crushing. The stitch can be either removable, or non-removable.

c) The fixing sewing stitches are very flat and offer a perfect display on the top and the bottom of the header cards.

d) A special anti-crushing presser foot avoids marks or crushing onto the header cards.

Very simple of use and maintenance thanks to the electronic adjustment of the speed of penetration of the needle, the number of stitches needed, and the needle bar stroke movement for the stitch width,
which is impossible to realize with a mechanical machine.

PRODUCTIVITY : 450 to 500 products / hour.

This production varies according to the operator skill, the series production volume and the organization of the workstation.
