

Specialized in the Research and designed of automated making-up, labelling and packaging machines for the textile industry.

New multi-pair packing machine for bulky socks by plastic fasteners and suspension hook for 5 or 6 pairs

Three versions are available :

Version 1 : Uses hooks in cartridges (Polypro type) for automatic feeding.

Version 2 : Uses individual hooks for manual insertion which enables to use hooks of different shapes.

Version 3 : Uses both « J »-hook in cartridges & individual hooks.

Photo n°1

This simple and sturdy machines enables 2 types of display for bulky products type sport socks, leisure socks, etc. :

a) Packing of 5 pairs of socks + a hook attached by only 1 plastic fastener.

b) Packing of 6 pairs of socks + a hook attached by 2 plastic fasteners : one on the top, the second one on the bottom (see diagrams).

NB: The number of items that can be bulked together depends on the item thickness,

This is why we recommend you to send us some item samples.

FLEXIBILITY Enables to bulk socks with or without hooks.

Enables to use hooks automatically or manually fed.

Enables to attach rider-labels by plastic fasteners.

Option : Automatic tag feeder (photo n°2).

QUALITY Perfect tagging quality thanks to extra-long & fine Tecma's needles.
