SPECIAL TECMA
MULTI THICKNESS
PRESSER FOOT
ANTI CRUSHING

MAIN ORIGINAL SPECIFICATIONS OF THIS MACHINE :

VERSATILITY : the special TECMA presser foot device and needle bar movement enable a non-compressed space of **25 mm *** between the arm and the special presser foot, thereby enabling to use fine or medium products

(* after sewing the maximum thickness will be 20 mm).

Removable or non-removable sewing stitch can be simply selected by the operator.

Uses cardboard labels of all sizes and shapes.

Can be fitted with optional devices (examples : automatic label dispenser, semi automatic label pick up device...).

QUALITY : Thanks to the device for **anti crushing / anti marking of label .**

Device for **anti cut of label** with flexible sewing stitch anti damage to products.

MAINTENANCE : Very easy maintenance and use.

PRODUCTION : About 850 labels sewn per hour.
