

Specialized in the Research and Design of automated making-up, labelling and packaging machines for the textile industry.

MACHINE FOR ATTACHING CARDBOARD LABELS TO SOCKS BY 1 FINE PLASTIC PIN FOR MULTI-PACKAGING.
Simple, sturdy, economical.
NO Electric Needs (pneumatic control).

Model
FP.11 S + 40

A few different possible presentations : see diagrams.

FLEXIBILITY : Enables many packaging styles with quick changes by the operator, without a set of tools. Possibility to insert several plastic pins next to another or one behind another. Presser foot quickly adjustable to different thicknesses. Enables usable space from 4 mm to 40 mm maximum (products are never compressed in order to avoid cardboard crushing).

STURDINESS : This very simple-designed-machine, substitutes to fragile and non-reliable manual guns, and provides solidity, reliability and durability.

QUALITY: No damages (holes, snags, crushed labels). Moreover products are NOT compressed.

SAFETY: Avoids painful carpian-tube related- troubles caused by a manual gun.

PRODUCTIVITY : Important due to the comfort of use of this equipment.

SIMPLICITY : This equipment is easy to install with simple use and maintenance.
