

MACHINE FOR FASTENING CARDBOARD LABEL BY A PLASTIC FASTENER TO MEDIUM AND THICK SOCKS FOR MULTI-PACKAGING With pneumatic control

A few possible displays: see diagrams

FLEXIBILITY : Enables many packaging styles with quick changes by the operator, without a set of tools. The presser foot is adjustable to adapt to different thicknesses. The maximum space under the presser foot is **60 mm**, with only 20 mm pressure which means that any thickness that does not exceed 40 mm is not compressed, resulting in a **perfect presentation**.

STURDINESS : This very simple-designed-machine, substitutes to fragile and non-reliable manual guns, and provides solidity, reliability and durability.

QUALITY: No damages (holes, snags, crushed labels).
Up to 40mm thickness products are **NOT** compressed.

SAFETY : Avoids painful carpian-tube related- troubles caused by a manual gun.

PRODUCTIVITY : Up to 850 pieces / hour.

EASINESS : This equipment is easy to install with simple use and maintenance.
