

MACHINE FOR ATTACHING TAGS OR LEAFLETS TO PRODUCTS RUNNING CONTINUOUSLY ON A CONVEYOR OR ON STATIONARY INDIVIDUAL WORKSTATION

NEW

The feature of this machine consists in fastly attaching tags to different products running continuously on a conveyor.

This assembly consists of a conveyor, a plastic fastener insertion head, an automatic tag dispenser (not shown on the picture) and an evacuation device (version: continuous – see diagram 1)

APPLICATIONS : box tagging, food tagging, teddy bear or similar product tagging, plastic pots (jars) tagging.

This machine can be offered in different versions upon request.

DIAGRAM 1

When operating in individual workstation the operator manually places the tag, positions the product, starts the cycle for plastic fastener insertion and manually evacuates the product (see photo).
