

Specialized in the Research and Design of automated making-up, labelling and packaging machines for the textile industry.

NEW MACHINE FOR FASTENING TAGS, LEAFLETS OR RIDER LABELS BY PLASTIC PIN TO UNDERWEAR, CORSETRY, GARMENTS ETC.

IMPORTANT:

The simplified design of this machine and its light maintenance make it a perfect labelling machine for frequent changes of packaging styles without need of a technician or tool.

MAIN SPECIFICATIONS:

ECONOMICAL :

This equipment is **NOT EXPENSIVE** with simple installation, operation and maintenance.

It does not require any specific knowledge from the operator.

FLEXIBLE :

Possibility to fasten rider labels, leaflets or tags.

Uses different lengths of plastic pins in clips, either Nylon or Polypro made.

COMFORTABLE :

Avoids the operator to face painful carpien-tube related problems caused by using guns.

SOLID :

Sturdy equipment, unrivalled in terms of lasting quality from the traditional plastic fastening guns.

QUALITY :

This type of fastening by plastic pin does not cause any damage to products when they are perforated thanks to its ultra fine needle.

SAFETY :

Integrated operator safety.

PRODUCTIVITY :

The user-friendly design enables the operator to get high production (however, this will depend on the operator skill, the workstation, and the duration of the production runs).

APPLICATIONS :

Corsetry, Underwear, Garments.
