## MACHINE FOR SEWING TAGS OR LEAFLETS TO UNDERWEAR, CORSETRY, GARMENTS ETC. FITTED WITH 1 OR 2 AUTOMATIC TAG DISPENSERS..

MODEL DESP with 1 automatic tag dispenser.

MODEL DE2SP with 2 automatic tag dispensers.

### MAIN SPECIFICATIONS

**SIMPLICITY:** This is a sturdy device, simple of use, installation and maintenance.

**QUALITY:** No product damage (even the finest products) thanks to its special fabric maintaining device during sewing operation.  
Extra fine needles enable to tag without any risk of product damage.

**FLEXIBILITY:** This machine enables to attach any size or shape of tags or leaflets.  
Changing sizes or shapes is achieved in a few seconds by the operator without any tool.

This device can be made with different types of sewing machines type **Brother, Juki, Yamato**.  
Model with 2 automatic dispensers: 2 tags are fed simultaneously and overlaid (**diagram 1**).  
Alternative : 2 tags can be attached to 2 different places on the product (**diagram 2 & 3**).

**PRODUCTIVITY:** Up to 1200 taggings/hour. This production may vary according to series volume, type of workstation, and operator skill.

**APPLICATIONS:** CORSETRY, UNDERWEAR, GARMENTS, HOME TEXTILES ETC.
